

## T-SHIELD VP6

Designed specifically to meet the needs of law enforcement forces, **T-SHIELD VP6** provides a high level of immediate protection during intervention or surveillance situations that can turn into violence.

It offers ballistic protection against handguns, rifles and particularly against ammunition from Kalashnikov automatic rifles **7.62x39 M43 MSC**. (Certified according to **VPAM 6** standard)

The **T-SHIELD VP6** shield combines performance, mass control, durability and affordable price.

Its shape and grip have been designed for everyday use, with a multi-grip handle in light alloy, an overall size of **475x700mm** for body protection and an optimised weight that does not exceed 9 kg.

Edge protection reinforces the shield for tough everyday use.

In addition to the ballistic protection described below, the **T-SHIELD VP6** is **fireproof** (Molotov cocktails, fireworks mortars, etc.), it is also resistant to all types of stabbing attack

and is totally insensitive to water, humidity, shocks, etc.

An optional lighting and glare bar is attached to the shield by a hook-and-loop fastener.
